
SANTA CRUZ II

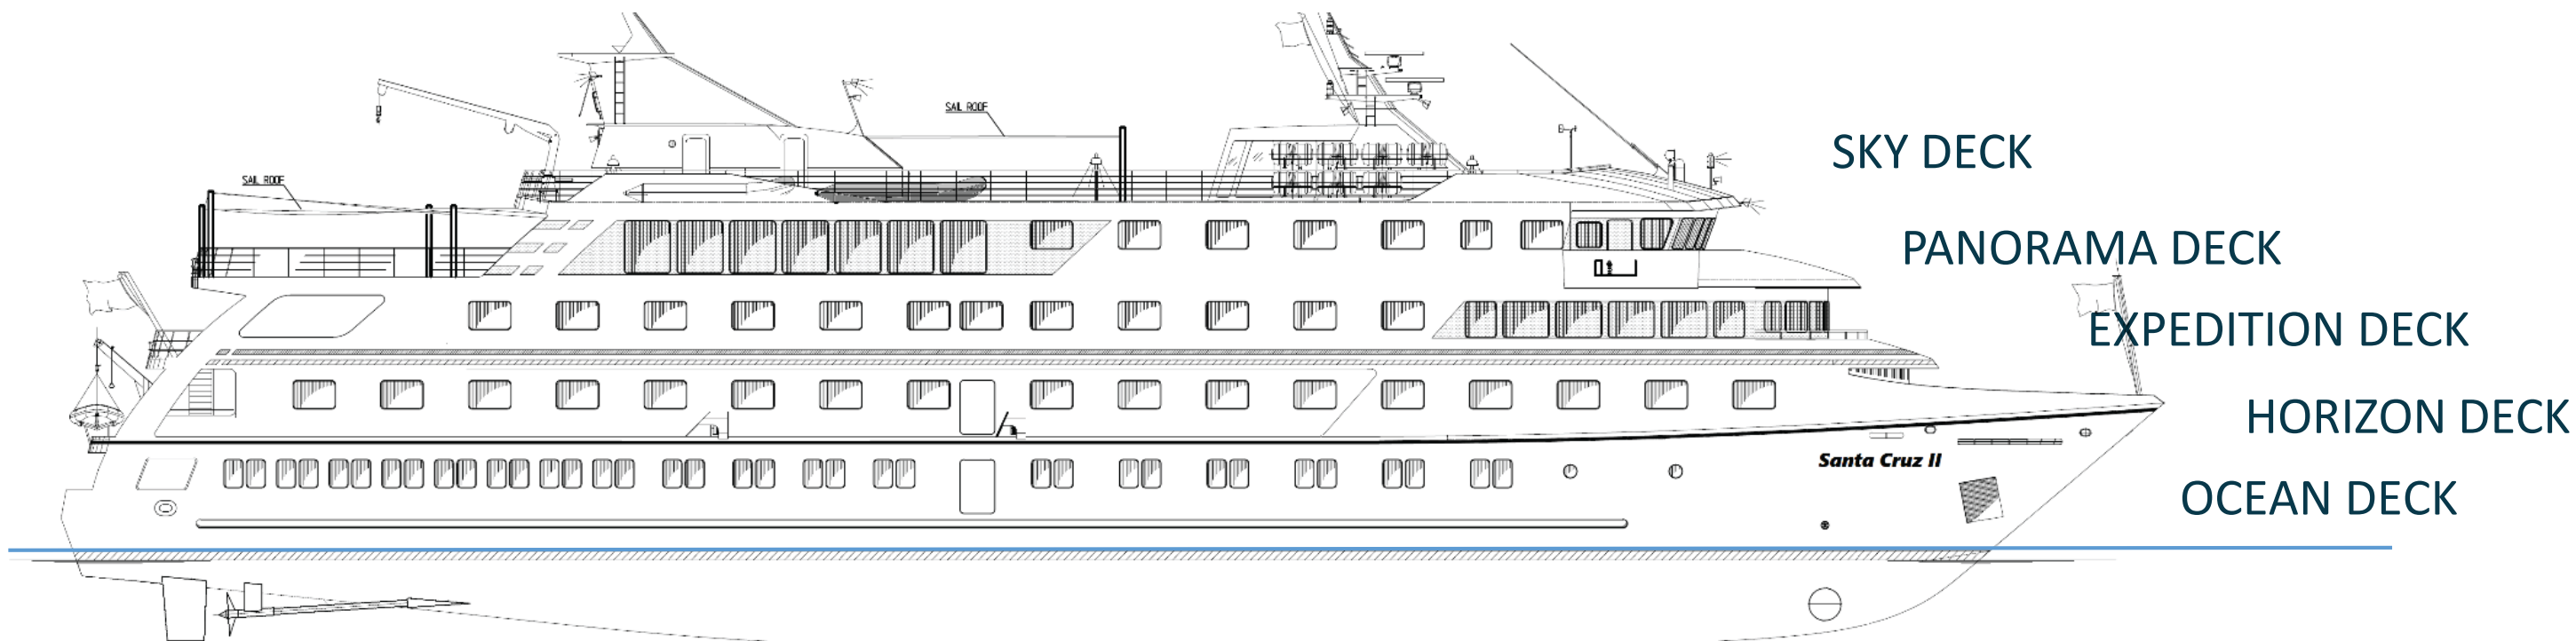

A large white and blue cruise ship, the Santa Cruz II, is shown from a side profile, sailing on a deep blue ocean. The ship has multiple decks with rows of windows and a prominent white funnel. In the background, there are two large, dark, rocky islands under a clear blue sky. The ship is positioned in the lower half of the frame, with the islands rising behind it.

SANTA CRUZ II

Metropolitan Touring presents the new Santa Cruz II, the perfect combination of a state-of-the-art vessel plus our more than four decades of experience exploring the Galápagos Islands. Anchors aweigh in the fourth quarter of 2015!

| • Conferences and lectures | • Wetsuits |
| • Island excursions and activities | • Internet service |
| • Snorkelling equipment | |
| • Kayaks | |

The Big 15

Wildlife list by Metropolitan Touring

From giant tortoises to little tropical penguins, the most distinctive feature of the Galápagos is its wildlife. These animals live within a vast archipelago, among multiple islands and astonishingly diverse habitats. To tailor our itineraries and enable guests to view the best balance of Galápagos fauna, we sought consensus among 20 top naturalist guides to choose the archipelago’s most unique and fascinating animals. This resulted in *our* list of the iconic **Big 15** that form the heart of our itineraries. **The Big 15** list empowers guests to find the most attractive route for their visit.
